

welcome home

to our selection of high quality composite doors designed with both **style** and **security** in mind.

Welcome to the VEKA composite door system.
Perfect for homeowners who want the look and feel
of a quality timber door without the drawback of
continual maintenance.

Superior looks and performance from one of the
UK's leading home improvement manufacturers –
this is the VEKA composite door.

The VEKA composite door system; traditional design, modern materials

VEKA has been leading the world in the
development and manufacture of PVC-U home
improvement products for decades, and during
that time we've built up a sterling reputation to be
proud of. Our products have been used in some of
the world's biggest and most prestigious building
projects as well as literally thousands of homes
across the globe.

It's all in the detail

The VEKA composite door spent over a year in
development to ensure that every aspect fulfils the
demands of the trade and the consumer.

These aspects include:

- Range of 30 door styles, 6 exterior colours
and 2 woodgrains - Rosewood and Golden Oak
- Colourfast GRP skin to minimise the
appearance of scratches
- Supplied fully framed. Frames are available in
2 styles - Sculpted or Chamfered and in a choice
of 5 colours. All our frames are easy to install
and ensure a perfect fit.

Peace of mind

Installed with care, only by recognised installers,
the VEKA composite door has been accredited with
MACO Secure Plus, making it the ideal choice for
customers who want quality products, affordable
prices and most importantly, peace of mind.

A new level of quality

The VEKA composite door offers all the traditional good looks of timber without any of the drawbacks. While timber may crack, split or warp and of course, need regular sanding and re-painting, PVC-U requires very little maintenance and offers all the security, performance and long-life expectancy of modern materials.

You get all of this with the VEKA composite door – as well as the world-wide reputation for the best quality products and service that comes as standard.

The tough GRP surface is highly scratch-resistant and will help it keep that 'new look' finish through its long life. This is mounted onto a composite material sub-frame, supported by laminated timber stiffeners and pressure filled with energy-efficient foam. The outer edge of the door is protected with a hard wearing PVC-U strip that provides a neat and durable finish.

As standard the threshold is 70mm PVC-U but this can be altered to an aluminium low threshold with the option of a wheelchair friendly ramp.

Benefits of the VEKA composite door

- All selected doors are available with woodgrain on both sides (this excludes the cottage design)
- Compatible with Maco Secure Plus requirement*
- Ten year parts & labour warranty*
- £1000 excess cover in the event of a break-in*
- 24/7 hour call out with a 2 – 4 hour response time in the event of an emergency*
- Ten year performance guarantee on hardware

ALL DOORS 1.6 OR LESS
All VEKA composite doors have a U-value of 1.6 or less to comply with Building Regulations across the UK.

Selected glass patterns are triple glazed for further enhanced performance. Look out for the logo throughout this brochure.

Security Hooks with additional linear bolt as standard top and bottom.

A VEKA composite door will provide you with the utmost security, so you can have peace of mind that you will be safe and secure in your own home.

Optional Secondary Deadlock with Thumbturn Cylinder

Safe as houses

Home security is the number one priority for any homeowner, and the VEKA composite door has been designed to exceed even the most stringent of expectations. You not only want a door that looks great, but one that keeps out more than the cold and draughts.

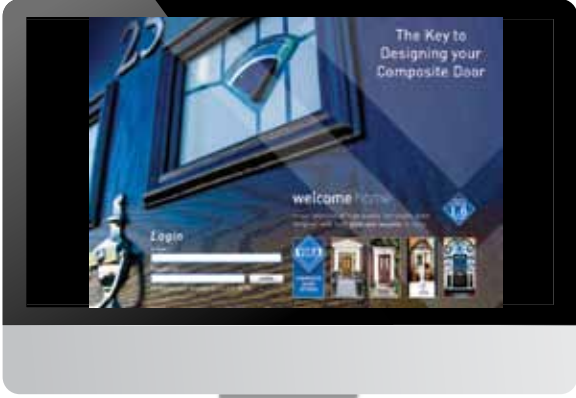

It might look warm and welcoming to visitors, but the VEKA composite door is fitted with top of the range hardware to provide a formidable barrier against any would-be intruders to ensure your home and possessions are protected.

Approved by MACO, a leading manufacturer of security locking hardware, the VEKA composite door is made to meet the rigorous standards demanded for compliance to the MACO Secure Plus* scheme. This unique scheme recognises how home security is paramount and endorses products incorporating its locks by offering an independent guarantee and warranty.

Secondary Dead Bolt

The VEKA composite door comes with the option of a secondary deadlock that operates independently of the main lock. This is located at shoulder height and operated by a simple thumb turn, which then throws a 20mm dead-bolt into the frame for additional security. It also has a secondary function of securing the door from being opened from the inside by young children and ensuring their safety. When trying to gain access from the outside the deadlock can be simply disengaged by the use of the normal key.

*membership required

Create your perfect VEKA composite door with our online 'design a door' feature and choose from a wide range of door styles, colours or woodgrains, glazing options, side panels and hardware which will complement your home.

You're the designer

Visit your composite door installer today and design your own door. See exactly how your new door will look by choosing your door's style, colour and glazing options. You can upload a picture of your home and superimpose the door you have designed to ensure your choice complements it perfectly.

All VEKA composite doors are available in a choice of 30 door styles, numerous glazing options and 7 external colours including 2 woodgrains. Doors with a white internal colour are supplied with a white grained effect edgeband to give that realistic finish. Selected door styles are also available with the woodgrain finish on both sides.

Door Frames

Doors

Note: In certain light, the frame & door slab may appear slightly different due to the different material composition

Hardware Colours

Stainless Steel Bar Handles

Hardware

Hardware options

Go that extra step and give your VEKA composite door even more individuality by choosing the style of handle that suits your home in one of eight colours that makes a statement about you.

Choose from the straight, swan necked door handle or if you want to keep that opportunist burglar at bay why not choose a pad handle that requires the key to retract the latch.

Safe and Secure no need to lock up

Automatic locking door

Upgrade to an automatic locking door.

This lock negates the need for a lever / lever door handle. You just pull or push the door closed with the bar handle and it automatically throws the hooks and deadbolt, making your home secure.

When leaving your home or going to bed just simply turn the key to deadlock everything into position.

Door hinges

All VEKA composite doors are fitted with the neat and unobtrusive 2D butt hinge designed with longevity in mind; these simple hinges give the minimum of adjustment by the use of the removable covers and come in the choice of 5 colours.

You also have the option to upgrade to the D2D hinge which is designed with greater adjustment for doors being fitted into older properties where it might be needed and it is also available in a wider range of colours to make it more suitable for outward opening doors.

2D Butt Hinge
D2d Adjustable Hinge

Side Panels

Side panels to complement your VEKA composite door are available with or without glazing. Choose from half and full-frame side panels. If you are ordering side panels we can design the glass to complement the door glass.

Glazing

Glazing options

Give your VEKA composite door even more individuality with our choice of glazing panels. Choose from a wide array of glass designs and production techniques to create a stylish option for your home, from conventional coloured glass to elaborate Art Deco bevels. We also offer a full range of textured or clear backing glass.

Glazing options include:

- Leads
- Colours
- Bevels
- Fusion art
- Etching

Glass pattern range for backing glass

Below are textured glass designs that can be incorporated into your glass designs apart from the triple glazed designs which have the patterned design built in.
